

Dear New Parent/Guardian,

Welcome to the Green Meadow Waldorf School community.

In accordance with New York State law, all new students must submit immunization records and a current physical evaluation before starting school. Updates of the medical records are also required in grades 2, 4, 7 and 10 and annual physicals are required for older students who participate in the extra curricular sports programs.

There are medical forms on our website <http://www.gmws.org> that can be downloaded. In addition, examinations performed by a licensed professional for camp or other summer activities generally meet the requirements for school and we accept the standard forms that many pediatricians now use

If you will be requesting exemption from immunization, the form we use for Religious Exemption can also be downloaded from our website. All of these forms are available on request from Mrs. Sandstrom in the Lower School Office or from the Care Room.

If your child has a particular health problem, especially one that might require treatment at school, please see that the condition is described on the physician's report and the trip form. Any time medication comes to school it must be accompanied by a doctor's order.

If you have any questions please call the Lower School office, ext. 300.

Sincerely,

Susan Gordon RN
